

SCOPE OF ACCREDITATION TO ISO/IEC 17025:2017

TUV RHEINLAND OF NORTH AMERICA, INC.  
710 Resende Road, Building 199  
Webster, NY 14580  
Mr. David Spencer Phone: 800-283-5411 ext. 2116  
Email: dspencer@us.tuv.com

ELECTRICAL

Valid to: November 30, 2020

Certificate Number: 3331.08

In recognition of the successful completion of the A2LA evaluation process (including an assessment of the laboratory's compliance with A2LA's ENERGY STAR® Accreditation Program requirements <sup>1)</sup>, accreditation is granted to this laboratory to perform the following radio, telecommunications, electromagnetic compatibility (EMC), and product safety tests:

**Test Description:**

**Test Method(s) <sup>2)</sup>:**

***Emissions***

Radiated & Conducted  
(up to 40 GHz)

47 CFR, FCC Part 15 B (using ANSI C63.4:2014);  
47 CFR, FCC Part 18 (using MP-5:1986);  
ANSI C63.4:2009;

<sup>1</sup> A2LA provides accreditation to the U.S. EPA's [Conditions and Criteria for Recognition of Laboratories for the ENERGY STAR Program](#) by verifying an organization's compliance to A2LA document [R222 - Specific Requirements - EPA ENERGY STAR Accreditation Program](#) and to the related test methods listed above.

Accreditation by A2LA does not infer Recognition by the EPA for ENERGY STAR testing. Please verify this organization's recognition status at the EPA's website, located at [http://www.energystar.gov/index.cfm?fuseaction=recognized\\_bodies\\_list.show\\_RCB\\_search\\_form](http://www.energystar.gov/index.cfm?fuseaction=recognized_bodies_list.show_RCB_search_form)

<sup>2</sup> When the date, revision or edition of a test method standard is not identified on the scope of accreditation, the laboratory is required to be using the current version within one year of the date of publication, per *Part C., Section 1 of A2LA R101 - General Requirements - Accreditation of ISO-IEC 17025 Laboratories.*

<sup>3</sup> For Product Family Standards listed on this scope of accreditation, the laboratory is found to be compliant with all test methods referenced within the Product Family Standard. As such, if outdated versions of the specific test methods are identified by the Product Family Standards listed on this scope of accreditation, it is not necessary to explicitly list the outdated versions of the specific test methods on the scope. In addition, the laboratory is capable of issuing accredited test reports to the outdated versions of the specific test methods although the outdated versions are not listed on this scope of accreditation.

Testing Activities Performed in Support of FCC Declaration of Conformity and Certification in Accordance with 47 Code of Federal Regulations and FCC KDB 974614, Appendix A, Table A.1 <sup>4</sup>:

<b>Rule Subpart/Technology</b>	<b>Test Method</b>	<b>Maximum Frequency</b>
Unintentional Radiators Part 15B	ANSI C63.4:2014	40000 MHz
Industrial, Scientific, and Medical Equipment Part 18	FCC MP-5 (February 1986)	40000 MHz
Intentional Radiators Part 15C	ANSI C63.10:2013	40000 MHz
U-NII without DFS Intentional Radiators Part 15E	ANSI C63.10:2013	40000 MHz

<sup>4</sup> Accreditation does not imply acceptance to the FCC equipment authorization program. Please see the FCC website (<https://apps.fcc.gov/oetcf/eas/>) for a listing of FCC approved laboratories.

## <sup>2</sup> Exclusion Tables

Table #1: Clauses excluded from IEC 60950-1 and IEC 62368

Standard	Clause	Measurement/Testing
IEC 60950-1	2.1.1.8	Energy hazards – D.C. mains supplies
IEC 60950-1	2.3.1 / 2.3.4	Limits of TNV circuits
IEC 60950-1	2.3.5	Operating voltages generated extern.
IEC 60950-1	2.9.2	Humidity conditioning
IEC 60950-1	2.10.9	Thermal cycling
IEC 60950-1	4.3.7	Mold stress relief
IEC 60950-1	4.3.6	Direct plug-in equipment
IEC 60950-1	4.3.13	Radiation – Ionizing radiation
IEC 60950-1	4.6.5	Adhesives for constructional purposes
IEC 60950-1	6.2	Protection of equipment users from over-voltages on telecom. Networks
IEC 60950-1	6.3	Protection of the telecommunication wiring system from overheating
IEC 60950-1	7.3	Protection of equipment users from over-voltage on cable distribution systems
IEC 60950-1	7.4.2	Voltage surge test
IEC 60950-1	7.4.3	Impulse test
IEC 60950-1	Annex A	Resistance to heat and fire
IEC 60950-1	Annex H	Ionizing radiation
IEC 60950-1	Annex M	Telephone ringing signals
IEC 60950-1	Annex Q	Voltage dependent resistors
IEC 60950-1	Annex U	Triple insulated wire
IEC 62368-1	4.7	Equipment for direct insertion in to mains socket-outlets
IEC 62368-1	5.4.1.5.3	Thermal cycling test procedure
IEC 62368-1	5.4.2.3.2.5	Determining transient voltage levels by measurement
IEC 62368-1	5.4.4.6.5	Mandrel test for inseparable thin sheet material
IEC 62368-1	5.4.5.2	Antenna terminal insulation
IEC 62368-1	5.4.8	Humidity conditioning
IEC 62368-1	8.5.4.2	Equipment having an electromechanical device for destruction of media
IEC 62368-1	8.5.5.2	High pressure lamps
IEC 62368-1	10	Radiation
IEC 62368-1	Annex G.9	IC current limiters
IEC 62368-1	Annex G.10	Test for resistors serving as a safeguard
IEC 62368-1	Annex G.13	Tests on coated printed boards
IEC 62368-1	Annex G.15	Pressurized liquid filled components
IEC 62368-1	Annex G.16	IC including capacitor discharge function (ICX)
IEC 62368-1	Annex J	Insulated winding wires for use without interleaved insulation
IEC 62368-1	Annex R	Limited short-circuit test
IEC 62368-1	Annex S	Tests for resistance to heat and fire
IEC 62368-1	Annex U	Mechanical strength of CRTs and protection against the effects of implosion

Table #2 Clauses excluded from IEC 60065

Clause	Measurement/Testing
6.1	Ionizing radiation
6.2	Laser radiation
6.3	Light emitting diodes
8.3	Hygroscopic materials
8.17	Endurance test for wound components
8.21	Mandrel test
10.2	Surge test
10.3	Humidity treatment
12.1.3	Vibration conditioning
12.1.6	Stress relief
12.3	Remote controls
13.3.4	Transient voltages
13.6	Jointed insulation
13.7	Enclosed and sealed parts
14.2	Resistors – damp heat test
14.6	Protective device testing
15.4	Device forming part of the mains plug
18	Mechanical strength of picture tubes and protection against effects of implosion
20.1.3	Pre-conditioning of printed circuit boards
Annex A	Additional requirements for apparatus with protection against splashing water
Annex G	Flammability test methods
Annex H	Insulated winding wires for use without interleaved insulation

Table #3 Clauses excluded from IEC 61010-1

Clause	Measurement/Testing
6.7.1.3	Test equipment for tracking index
6.8.2	Humidity conditioning
9.3.1	Flammability tests
10.5.2	Non-metallic enclosures
11.6	Specially protected equipment (IP rated)
11.7	Fluid pressure and leakage
12.2.1	Ionizing radiation
12.3	UV radiation
12.4	Microwave radiation
12.5	Sound pressure measurements
12.6	Laser sources
13.2.3	Implosion of cathode ray tubes
14.7	Flammability tests
14.8	Transient over voltage
Annex H	Qualification of conformal coating for protection against pollution

Table #4 Clauses excluded from IEC 60601-1

Edition of Standard	Clause	Measurement/Testing
Ed. 2	29	X-radiation
	37	Flammable gasses
	App. F	Flammable mixtures
Ed. 3	8.9.1.7	Material groups classification
	9.5.2	Cathode ray tubes
	9.6.3	Hand-transmitted vibration
	9.7.5	Pressure vessels
	10.1	X-radiation
	11.2	Fire prevention (spark ignition apparatus)
	G	Protection against hazards of ignition of flammable anesthetic mixtures
	G.4.3	Prevention of electrostatic charges
	L	Insulated winding wires for use without interleaved insulation

## Accredited Laboratory

A2LA has accredited

**TUV RHEINLAND OF NORTH AMERICA, INC.**

Webster, NY

for technical competence in the field of

**Electrical Testing**

This laboratory is accredited in accordance with the recognized International Standard ISO/IEC 17025:2017 *General requirements for the competence of testing and calibration laboratories*. This laboratory also meets the A2LA R222 - Specific Requirements - EPA ENERGY STAR Accreditation Program. This accreditation demonstrates technical competence for a defined scope and the operation of a laboratory quality management system (refer to joint ISO-ILAC-IAF Communiqué dated April 2017).

Presented this 28<sup>th</sup> day of January 2019.

A blue ink signature of the Vice President of Accreditation Services.

Vice President, Accreditation Services  
For the Accreditation Council  
Certificate Number 3331.08  
Valid to November 30, 2020  
Revised March 18, 2019

*For the tests to which this accreditation applies, please refer to the laboratory's Electrical Scope of Accreditation.*
